

Arhiva Apostilelor

Comentariu de arhivă

Această arhivă nu este doar un depozit tehnic de fișiere PDF și nici nu este o colecție privată de decizii judecătorești.

Este o gamă structurată de documente autentificate cu un apostilă—adică confirmată printr-un mecanism care funcționează în cadrul sistemul stabilit în cadrul **Conferinței de la Haga privind Dreptul Internațional Privat**.

Apostila certifică autenticitatea unei semnături și statutul unui oficial. Nu certifică legalitatea conținutului unui act judiciar.

Această distincție este esențială pentru înțelegerea scopului arhivă.

Scopul publicării arhivei

Arhiva a fost creată pentru:

1. Stabilirea cronologiei deciziilor judiciare
2. Demonstrează inconsecvențele procedurale
3. Analizați tiparele structurale recurente
4. Identificarea semnelor de impunitate instituțională
5. Sprijin în cascadă de reabilitare judiciară

Nu este vorba despre soarta unei singure persoane, ci despre examinând modul în care sistemul răspunde la acuzațiile de tortură și încălcări grave.

Legătură cu articolul 17 din Statutul de la Roma

Articolul 17 din Statutul de la Roma al Internaționalei Curtea Penală stabilește principiul **complementarității**.

Esența prevederii:

Jurisdicția internațională este activată dacă statul:

- nu **este dispusă** să facă un lucru autentic investigație, sau
- este **obiectiv incapabil** să facă acest lucru.

Arhiva permite cititorului să pună întrebarea independent:

Se desfășoară o investigație autentică privind acuzațiile de tortură?
Sau există proceduri formale care simulează activitatea judiciară?

Dacă deciziile evită sistematic analiza acuzațiilor de tortură, în timp ce se creează aparența completării procedurale, o problemă a conformitatea cu criteriile articolului 17 apare.

What Is Offered to the Reader

The archive is open for independent analysis.

Readers are invited to:

- Cross-reference decision dates with apostille dates
- Check for repetition of formulations
- Compare the content of the reasoning sections
- Determine whether allegations of torture are examined on their merits
- Note identical procedural constructs in different cases

If a persistent pattern emerges where:

- Complaints are dismissed without examination of evidence
- No effective verification is conducted
- Medical or procedural materials are not assessed

This is not a private error but a **systemic problem**.

International Law Context

International law regards the prohibition of torture as a **jus cogens** norm—an imperative norm from which no derogation is permitted.

The obligation to investigate such acts is of an **erga omnes** character—a duty owed to the international community as a whole.

Conclusion

This archive is a tool for analysis.

It does not automatically prove the existence of a crime.

It shows the **structure of decisions**.

And poses the key question предусмотренный статьёй 17 Rome Statute of the International Criminal Court:

Was a genuine investigation carried out
or was there **justice simulation**?

The answer to this question defines the boundary between state domestic jurisdiction and international responsibility.
